

Young persons and adults with cerebral palsy and other physical disabilities (18-60 years) can become users of Day Care Center.

USEFUL TIPS IN OBTAINING DAY CARE CENTER SERVICES:

- Individual interview with the Professional Team
- Assessment during the trial stay in Day Care Center
- Applying the Service Request to relevant regional Centre for Social Welfare
- The recognition of the right to the service of the Centre for Social Welfare
- Decision issue and inclusion of users in service

DAY CARE CENTER ACTIVITIES

Special emphasis is placed on activities of daily living training, which is performed every day. The purpose of this methodology is to maximize the independence of users.

Rehabilitation Therapist, Occupational Therapist, Physiotherapist, along with the help of two Assistants implement an interdisciplinary approach to users performing every day activities.

IT equipment (adapted monitors, computer mice, and keyboard adaptations) are used in working with users.

Equipment to encourage communication (communicators, different imaging materials ...) is also used along with customized equipment for feeding.

Društvo osoba s cerebralnom i dječjom paralizom
